

**TransitSentry™**

**NEXT GENERATION MOBILE SECURITY**

# TransitSentry 2.0 REFINED USER SOFTWARE

The screenshot displays the TransitSentry 2.0 user interface. On the left, there are two camera feeds: the top one shows a street view from a vehicle's perspective, and the bottom one shows a view from a vehicle's rear deck. The main area is a map showing the location of various vehicles, with a specific vehicle (1741) highlighted in a red box. Below the map, there is a 'Vehicle Summary' section for vehicle 1741, which is 'Online'. The summary lists several components: Cameras, Mobile Router, NVR, NTP, Switch, and Power Controller, all with green checkmarks. A 'SELECT' button is also present. To the right of the summary is a 'Service Information' table for vehicle 1741.

Label	Value

TransitSentry™ 2.0 is a revolutionary approach to mobile video surveillance. Purposed designed for ultimate efficiency. TransitSentry™ 2.0 is engineered with mobile-centric efficiencies that provide organizations the ability to monitor their mobile assets with high quality live or recorded video with speed, reliability, and ease of use.

## Mobile Centric Features

- » Flexible browser based User Interface (UI)
- » Designed for TransitStor™ Mobile Video Transporter
- » Private, secure, Verizon LTE high speed wireless network
- » Video storage on multi-tenant cloud environment
- » GEOSearch™ video and incident management tools
- » 10,000+ Vehicles Supported (per tenant)
- » Self-healing feature improves system reliability

## Extreme Reliability

TransitSentry™ 2.0 utilizes a proactive RemoteAgent™ self-healing feature that monitors and maintains all onboard systems including the video recording archiver, radio communicator, PoE network switch, power control and video viewing screens.

## Efficient Video Technology

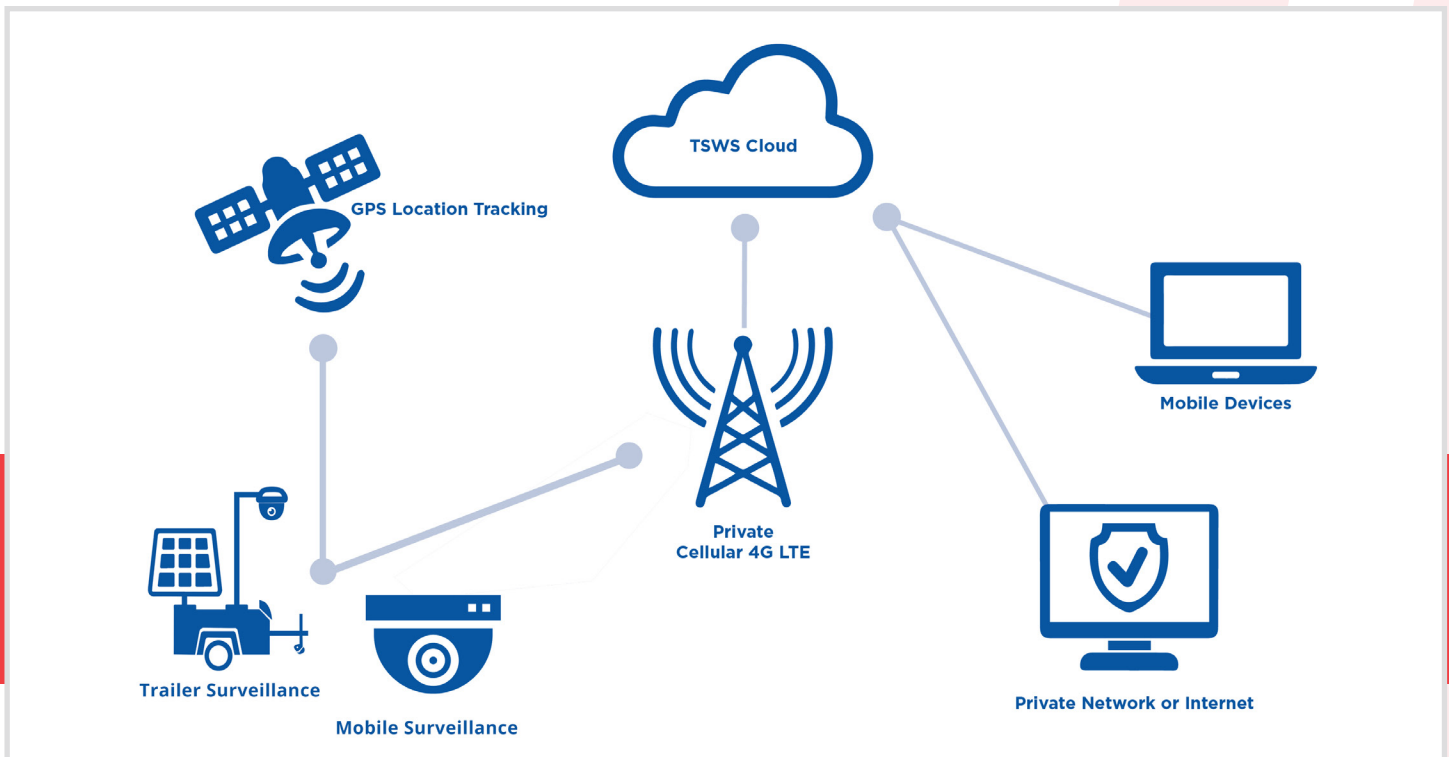

Designed to review live or recorded video from anywhere the internet goes, TransitSentry™ employs efficient video compression transcoding technology using open source<sup>1</sup> video compression.

This technology provides the user with the best quality remote video viewing experience available.

<sup>1</sup>VP8 & VP9 open source video compression technology developed by Google. RemoteAgent™ Patent Pending

# CLOUD BASED MOBILE SURVEILLANCE SYSTEM

The Transit Sentry™ mobile surveillance system can be deployed in a variety of mobile applications, including public transit, first responders, water taxis, armored transport, prison transport, school buses, mobile surveillance trailers, and more. The TransitSentry™ system is accessible from anywhere in the world via an internet browser. The TransitSentry™ cloud server can host a virtually unlimited number of mobile units that are automatically located on the TransitSentry™ live geographical mapping system. High definition video is available either live, streaming pre-recorded or downloaded.

# TRANSITSENTRY™ AT A GLANCE

Manage all of your safety and security operations from a single client interface. Monitoring, reporting, and configuration can all be done using the TransitSentry 2.0 user interface browser providing your team with the most efficient approach to managing your transit security system.

Task Based Interface

Centralized Alarm Management

Unified Events & Tiles Management

Dynamic Dashboard

Video Offloading

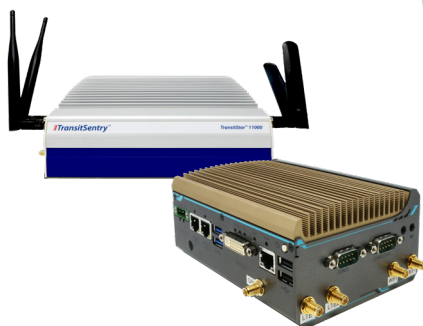

Geo Search™\*

## MOBILE HARDEDDED HARDWARE

Mission critical security equipment for rugged environments

### TransitSentry™ Mobile Video Solutions

- TransitStor 800 Mobile Video Transporter & Recorder
- TransitStor 11000 Mobile Video Transporter & Recorder
- CAMMS Cloud Autonomous Mobile Surveillance System - Trailer
- TransitStor 11000A Mobile Video Transporter & Recorder (analog camera compatible)

### Accessories

- Mobile Cameras (fixed & 360 degree)
- Two-way Audio Option
- Multi-element Antenna
- Mobile Network Switch's (8 & 16 port)
- Analog Camera to IP Video Encoder Break-out Interface
- UPS - Mobile Uninterruptible Power Supply
